## **DETAILED ACTION**

### ***Preliminary Amendment***

1. The preliminary amendment filed on July 22, 2003 canceling claims 1-22 and adding new claims 23-28 has been entered and made of record.

### ***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claim 23 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable at least over claim 19 of U.S. Patent No. 6,650,776. Although the conflicting claims are not identical, they are not patentably distinct from each other because the elements recited in claim 23 of application '083 is what is required and used to recognize the two-dimensional code as defined in at least claim 19 of the '776 patent.

Since claims 24-28 directly or indirectly depend on claim 23, they are also rejected under the judicially created doctrine of obviousness-type double patenting for the same reason set forth above for claim 23.

Art Unit: 2625

4. The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: a two-dimensional code having a reference cell, a number of corner cells, and a code part, wherein the reference cell has human-readable information associated with the two dimensional code directly visible thereon and serves as a reference in recognizing the two-dimensional code, each of the number of corner cells is located in a predetermined search range with respect to the reference cell, and the code part includes an area having code data assigned to the two-dimensional code. The scope of the claimed invention is fully disclosed in the '776 patent, and the claims of the current application are generic/broader compared to the patented claims, which is directed to a specific species.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.
